PLANT AND SOIL

Contents Volume 310 Nos. 1–2 September 2008

Regular Articles

Analysis of bacterial communities associated with spores of *Gigaspora margarita* and *Gigaspora rosea*
L. Long · H. Zhu · Q. Yao · Y. Ai **1–9**

Dynamics of simple carbon compounds in two forest soils as revealed by soil solution concentrations and biodegradation kinetics
P.A.W. van Hees · E. Johansson · D.L. Jones **11–23**

Mapping QTLs for mineral accumulation and shoot dry biomass under different Zn nutritional conditions in Chinese cabbage (*Brassica rapa* L. ssp. *pekinensis*)
J. Wu · Y.-X. Yuan · X.-W. Zhang · J. Zhao · X. Song · Y. Li · X. Li · R. Sun · M. Koornneef · M.G.M. Aarts · X.-W. Wang **25–40**

Effect of sanitized and non-sanitized sewage sludge on soil microbial community and the physiology of pepper plants
I. Pascual · M. Avilés · J. Aguirreolea · M. Sánchez-Díaz **41–53**

Plant symbiotic microorganisms in acid sulfate soil: significance in the growth of pioneer plants
T. Maki · M. Nomachi · S. Yoshida · T. Ezawa **55–65**

Domesticated emmer wheat [*T. turgidum* L. subsp. *dicoccon* (Schrank) Thell.] as a source for improvement of zinc efficiency in durum wheat
Y. Genc · G.K. McDonald **67–75**

Diverse rhizobia associated with soybean grown in the subtropical and tropical regions of China
C.X. Man · H. Wang · W.F. Chen · X.H. Sui · E.T. Wang · W.X. Chen **77–87**

Nitrous oxide emissions from multiple combined applications of fertiliser and cattle slurry to grassland
R.L.M. Schils · J.W. van Groenigen · G.L. Velthof · P.J. Kuikman **89–101**

Variation in small-scale spatial heterogeneity of soil properties and vegetation with different land use in semiarid grassland ecosystem
Z. Zhou · O.J. Sun · Z. Luo · H. Jin · Q. Chen · X. Han **103–112**

Analysis of the specificity of three root-feeders towards grasses in coastal dunes
E. de la Peña · M. Vandegehuchte · D. Bonte · M. Moens **113–120**

Nitrogen form, availability, and mycorrhizal colonization affect biomass and nitrogen isotope patterns in *Pinus sylvestris*
E.A. Hobbie · J.V. Colpaert · M.W. White · A.P. Ouimette · S.A. Macko **121–136**

Antioxidative response of metal-accumulator and non-accumulator plants under cadmium stress
Z. Wang · Y. Zhang · Z. Huang · L. Huang **137–149**

Copper phytotoxicity affects root elongation and iron nutrition in durum wheat (*Triticum turgidum durum* L.)
A.M. Michaud · C. Chappellaz · P. Hinsinger **151–165**

The small-scale pattern of seepage water nitrate concentration in an N saturated spruce forest is regulated by net N mineralization in the organic layer
B. Matejek · M. Kohlpaintner · R. Gasche · C. Huber · M. Dannenmann · H. Papen **167–179**

Influence of pasture understoreys and tree management on soil moisture under a young New Zealand stand of *Pinus radiata*
K.M. Pollock · D.J. Mead **181–199**

Effect of soil nitrogen stress on the relative growth rate of annual and perennial grasses in the Intermountain West
J.J. James **201–210**

Root allocation in metal-rich patch by *Thlaspi caerulescens* from normal and metalliferous soil—new insights into the rhizobox approach
C. Dechamps · N. Noret · R. Mozek · X. Draye · P. Meerts **211–224**

Dormancy and longevity of annual ryegrass (*Lolium rigidum*) as affected by soil type, depth, rainfall, and duration of burial
S. Narwal · B.M. Sindel · R.S. Jessop **225–234**

Sex-related differences in leaf traits in an androdioecious shrub under contrasting levels of soil salinity
J.L. Medina-Gavilán · A. Bartual · F. Ojeda **235–243**

Classification of rhizosphere components using visible–near infrared spectral images
T. Nakaji · K. Noguchi · H. Oguma **245–261**

Commentary

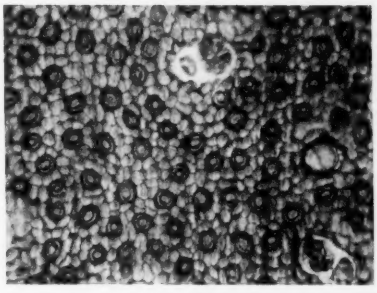
Multi-spectral imaging of rhizobox systems: New perspectives for the observation and discrimination of rhizosphere components
A. Pierret **263–268**

Errata

A simple field validation of daily transpiration derived from sapflow using a porometer and minimal meteorological data
I.A.M. Yunusa · I.K. Nuberg · S. Fuentes · P. Lu · D. Eamus **269**

Forest-scale sap flux responses to rainfall in a dryland eucalyptus plantation
H.D. Morgan · C.V.M. Barton **271**

Available online
www.springerlink.com



Enlarged leaf section of *Phillyrea angustifolia* (Oleaceae) in which stomata, epidermal cells and glandular trichomas can be distinguished. pp. 235–243
